

our vision:

... to be the national body responsible for establishing, advocating and promoting national standards in the practice of architecture for the benefit of the Australian community

our mission:

... is to promote common academic standards throughout Australia for the registration of architects, and to facilitate national and international recognition of qualifications

we value:

- Transparency
- Being respectful to everyone
- A rigorous approach to what we do
- Collaboration with our stakeholders
- Being an intelligent organisation that can respond and adapt

our strategic objectives:

Enhance the recognition and status of AACA as the peak body for national standards for architecture in Australia

strategies:

- 1.1 Engage with stakeholders
- 1.2 Identify opportunities for diversification for AACA to provide services
- 1.3 Promote our values, services and procedures
- 1.4 Provide a client service focus
- 1.5 Influence and advocate on government policy

Enhance strategic synergies with international authorities in order to advance the recognition of Australian standards for architect registration

strategies:

- 2.1 Develop mutual respect and trust with international counterpart bodies and international authorities
- 2.2 Engage with international and national bodies to promote equivalent competencies for architect registration
- 2.3 Identify and pursue opportunities for new international agreements for recognition of registration

Facilitate a national register for architects

strategies:

- 3.1 Facilitate discussion and dialogue between, and with, stakeholders to encourage their confidence in working towards a national register and the concept of an Australian Architect
- 3.2 Develop a model process for national registration
- 3.3 Facilitate acceptance of a national model

Operate efficiently and effectively

strategies:

- 4.1 Establish and maintain good corporate governance and management structures
- 4.2 Continually improve national processes
- 4.3 Continually improve information technology, administration and financial systems
