

Accredited Architecture Qualifications

The Architecture Program Accreditation Procedure in Australia and New Zealand sets out the peer review process through which all architecture programs in Australia are assessed against the accreditation standard over five years or ten semester equivalence of learning cycle. This assessment is made by an independent Accreditation Review Panel, composed of practicing architects and academics, which then makes a recommendation on whether and for how long a program should be accredited.

The Procedure is administered by the Architects Accreditation Council of Australia (AACAA) on behalf of the State and Territory architect registration boards who are responsible for the regulation of architects via the State and Territory Architects Acts. The New Zealand Architects Registration Board licences the Accreditation Procedure from the AACAA for the purpose of accrediting architecture programs in New Zealand.

The [eight state and territory architect registration boards](#) have statutory responsibility for the accreditation of architectural programs of study within their jurisdictions. Accredited programs are recognised in all other states and territories (and New Zealand, Hong Kong and Singapore). By agreement, architect registration boards are guided by the recommendations of the Accreditation Review Panel, however they are not bound to accept those recommendations.

All the Australian qualifications accredited for the purpose of entry to the [Architectural Practice Examination](#) are listed in the table below.
